How to choose the right cutting card for HU162T blades?
Key Cutting Guide

A search for automotive blade HU162T returns 3 results corresponding to Basic - Mid - High. The first difference to consider is the No. of cuts (see the ProTips section: "I have multiple results for a key blank on the machine"). In this specific case, the big difference is in the No. of cuts on both the side and the back of the key.

Favourite	St.	Lock/System	Profile	Series	Card	Type	N° of cuts
☆	1704	Basic (4T-8W)	-	-	4100	N	8,1,8,1
☆	1706	Mid (4T-9W+3W)	-	-	4105	N	9,3,3,9
☆	1892	High (4T-10W+4W)	-	-	4254	N	10,4,4,10

We can consider the back of the key.
If the key has only one depth on the back, the cutting card is 4100.
Note: Silca supplies a precoded key on the back for card 4100 which is HU162AT
